

ONUR ROOF TILE

"New Face of the Roofs"

RIDGE VENTILATION TAPE

Ridge ventilation tape; It is a waterproofing tape applied to the fractures of the moving points on the roof. Before the roof ridge tile is applied, it is applied with certain dimension and side accessories (purlin carrying profile, ridge fixing hook). The purpose of the roof ridge under the roof tile under the roof tile provides ventilation. Another feature is a kind of roof accessory used to prevent water ridge roof tiles from overlapping points under the roof tiles. Aluminum foil is coated with electrostatic paint which is resistant to sun rays and the same color is applied as the tile color. Aluminum foil is applied by applying high temperature resistant and long life butyl mastic to the roof tiles.

Onur Roof Tile
